Button, Ni-Cad, Lithium, and
Rechargeable Batteries
...And much more...give a call or
visit <http://hww.uvlsrpc.org>

Alkaline batteries: Most non-rechargeable batteries (AA, AAA, C, D, and 9-volt) are trash in NH. If in doubt, just bring to collection. Tape 9-volt terminals before disposal.

Ammunition and explosives: State Police at 271-3636.

Asbestos: Get a licensed asbestos specialist. Asbestos is hazardous to your health—don't even think about removing it yourself!

Automotive batteries: Take to parts store for cash back or your transfer station

Empty aerosol cans: Can be recycled with scrap metal. Talk to your town.

Fluorescent lights: May be taken at your town facility. Check with your town.

Food Co-ops and Home Depot may take CFLs (spiral bulbs), not tubes.

Latex paint: Use kitty litter, sawdust, or shredded paper to dry out latex paint; throw in your trash. Empty, dry metal cans may be recycled as scrap metal at your recycling facility. If it says "clean up with soap and water," it's latex.

Medicine: See www.twinstatesafemeds.com for police stations taking meds.

Medical sharps: Place in a rigid container (e.g. detergent bottle), seal cap with duct tape, and label container with marker, "Sharps, not for recycling."

Dispose of with regular trash by handing to a waste collector—can become a projectile if compacted in trash. *Lebanon Police Station accepts some sharps.*

Propane or helium tanks and fire extinguishers: Propane/helium tanks can be exchanged/refilled at a distributor; or contact town transfer station about empty tanks. Empty fire extinguishers can be recycled (NRRRA takes from towns).

Used motor oil: Take to town transfer station or a service station for recycling.
